StatPREP Consulting Day!

Wednesday April 17, 2019, any time during the day.

With the increasing number of StatPREP participants — both those who have participated in workshops and those who encounter StatPREP via our web site — we have found that it can be helpful to offer one-on-one consulting with StatPREP authors and workshop leaders.

Perhaps you're intrigued by a Little App, but aren't quite sure how it works, or what are the underlying statistical concepts, or how you would use it in class? Consult with us!

Perhaps you'd like to locate data that will be well suited to your class or topic? Consult

Join StatPREP Consulting Day!

Wednesday, April 17, 2019

Host by Danny Kaplan
Statistics Instructor at Maca-
lester College

With the increasing number of StatPREP participants — both those who have participated in workshops, webinars, and the statPREP web site — we have found that it can be helpful to offer one-on-one consulting with StatPREP authors and workshop leaders.

Book your online 30-minute appointment slot here: <http://statprep.org/statprep-consulting-day/>

- **Webinar series** — a great resource for viewing a number of recorded webinars that illustrate how to use some of the material available under the “Resources” tab.
- **Resources** — tools available for you to use in the classroom and how to use them:
 - ◇ Little Apps — which can be used in your classes to visually demonstrate various statistics concepts.
 - ◇ Class Lessons — which can be used in your classes to explore common concepts and illustrate commands if you want to use R software.
 - ◇ Tutorials — where you can learn about new concepts, and lists of datasets for you to use in your classes.
- **About** — contains information about StatPREP and its connections to the Mathematics Association of America (MAA), the American Mathematical Association of Two-Year Colleges (AMATYC), and the American Statistical Association (ASA).
- **Newsletters** — an archive of the previously issued StatPREP newsletters which include book reviews, interesting discussions and more.

Please explore the website, utilize the material and share it with others!

If you have suggestions about how we can improve the usability or content on the StatPREP website, please don't hesitate to contact us at kathryn.kozak@coconino.edu.

WEBINAR ARCHIVES

The StatPREP teams has presented webinars to help you use some of the material in your classes.

Below is a complete list of webinars offered by StatPREP. You can read a description of each of the webinars at <http://statprep.org/> - under the Webinar tab.

[Using the Little App “Linear Models”](#)
